My 9-1-1
Program

MY 911

VIAL OF LIFE

TO PARTICIPATE

My 911 is designed to assist emergency responders when responding to a call at your residence, place of business, motor vehicle accident or other types of emergencies.

My 911 takes the guesswork out by providing emergency personnel with critical information, such as a description of your residence, and the names and phone numbers of family members to contact in your time of need. You can also provide information to Fire Service and other emergency responders about someone living with you who may have trouble communicating or moving about.

In a health care crisis, it is important that emergency responders have as much information about your health as possible. The Vial of Life program can provide that vital information even when you may not be able to.

The Vial of Life Program works in conjunction with My 911 by providing life saving medical information about the medications you are currently taking, allergies or any special needs you or someone living in your home might have.

This program is designed for individuals with serious medical problems or allergies. The program gives emergency responders access to important medical information when you may not be able to respond to them. Participants receive a plastic medicine bottle to store their own personal medical and medication information in. The vial is then placed in the refrigerator where EMS personnel are trained to look upon arrival when responding to a medical emergency.

My 911 and Vial of Life programs are completely voluntary and the information provided will be kept strictly confidential and used only by Lexington County Personnel to provide assistance to you, your family or your property in the event of an emergency. You can provide as much or as little information as you would like.

To enroll in the program, fill out the form at any of these on-line locations:
